FOREWORD

The Georgia Statistical Abstract, which is published biennially, brings together in one reference volume the most pertinent information available about the state of Georgia.

Although the orientation of the Abstract is primarily economic -- with special emphasis upon economic resources -- other community and area resources are encompassed in the Government section and in the Education and Law Enforcement sections. Several parts of this Abstract are revised and expanded, particularly the Population and Vital Statistics sections and the chapter on Income, Gross State Product, and Wealth.

Special acknowledgement must be made of the efforts of the following persons who contributed to this major undertaking: Suzanne Lindsay, data specialist, for extensive revision of major sections; and Mary Evans, for typing the Abstract in its entirety.

Since most of the data in the Abstract are taken from sources outside the Division, the responsibility for the accuracy and limitations of the original data belongs to the original sources. For the selection of the data and their reproduction, the Division of Research accepts the responsibility.

[a] Personal income = net earnings plus property income and transfer payments. Prior to 1975, estimates are based on 1967 SIC; after 1975, estimates are based on the 1972 SIC.

[b] Includes dividends, interest and rent.

[b] Personal contributions for social insurance are implicitly included in the estimates of labor and proprietors' income. However, they are not included in personal income and so are subtracted from earnings in the computation of personal income.

[a] The Consumer Price Index, All Urban Consumers measures the average change in prices of goods and services purchased by urban consumers. The specific city indexes do not indicate whether it costs more to live in one city than another.

[b] Average of 85 areas.
